DETAILED ACTION

Allowable Subject Matter

Claims 1-7 and 9-21 are allowed.

The following is an examiner's statement of reasons for allowance:

The applicant's arguments filed 1/18/2007 are convincing.

As for claim 1, the prior art fails to teach or disclose a light directing assembly with a plurality of microprisms, each defining interstitial regions between the microprisms, with an optical means comprising a free-flowing reflective powder to shield a blocking means from direct exposure to light radiated from a light source.

In regard to claim 18, the prior art fails to teach or disclose a wedge plate with a plurality of microprisms with adjacent areas forming interstitial regions, the device having a channel plate that forms a plurality of reflective elements filled with free-flowing reflective powder.

In regard to claim 21, the prior art fails to teach or disclose a wedge plate with a plurality of microprisms that form interstitial regions, the device having a base holding plate that forms a plurality of reflective elements that are in communication with one of the interstitial regions, the reflective elements and the interstitial regions being filled with free-flowing reflective powder.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
